Former Policy Officer @French Government

## Nial Dixon

3rd year, Software Engineering  
Leicester University, UK

## Nout de Jong

4th year Master, Finance  
Erasmus University  
CFA Research Challenge Finalist

# Problem

## **FRAGMENTED ECOSYSTEM**

Different countries use different payment apps. No universal solution.

## **SLOW**

Usual international transfers, using SWIFT, take on average 3-5 days.

## **EXPENSIVE**

Fees: Bank + SWIFT + Exchange rate

## **BLACK-BOX**

Traditional banks offer no payment certainty and no clarity.

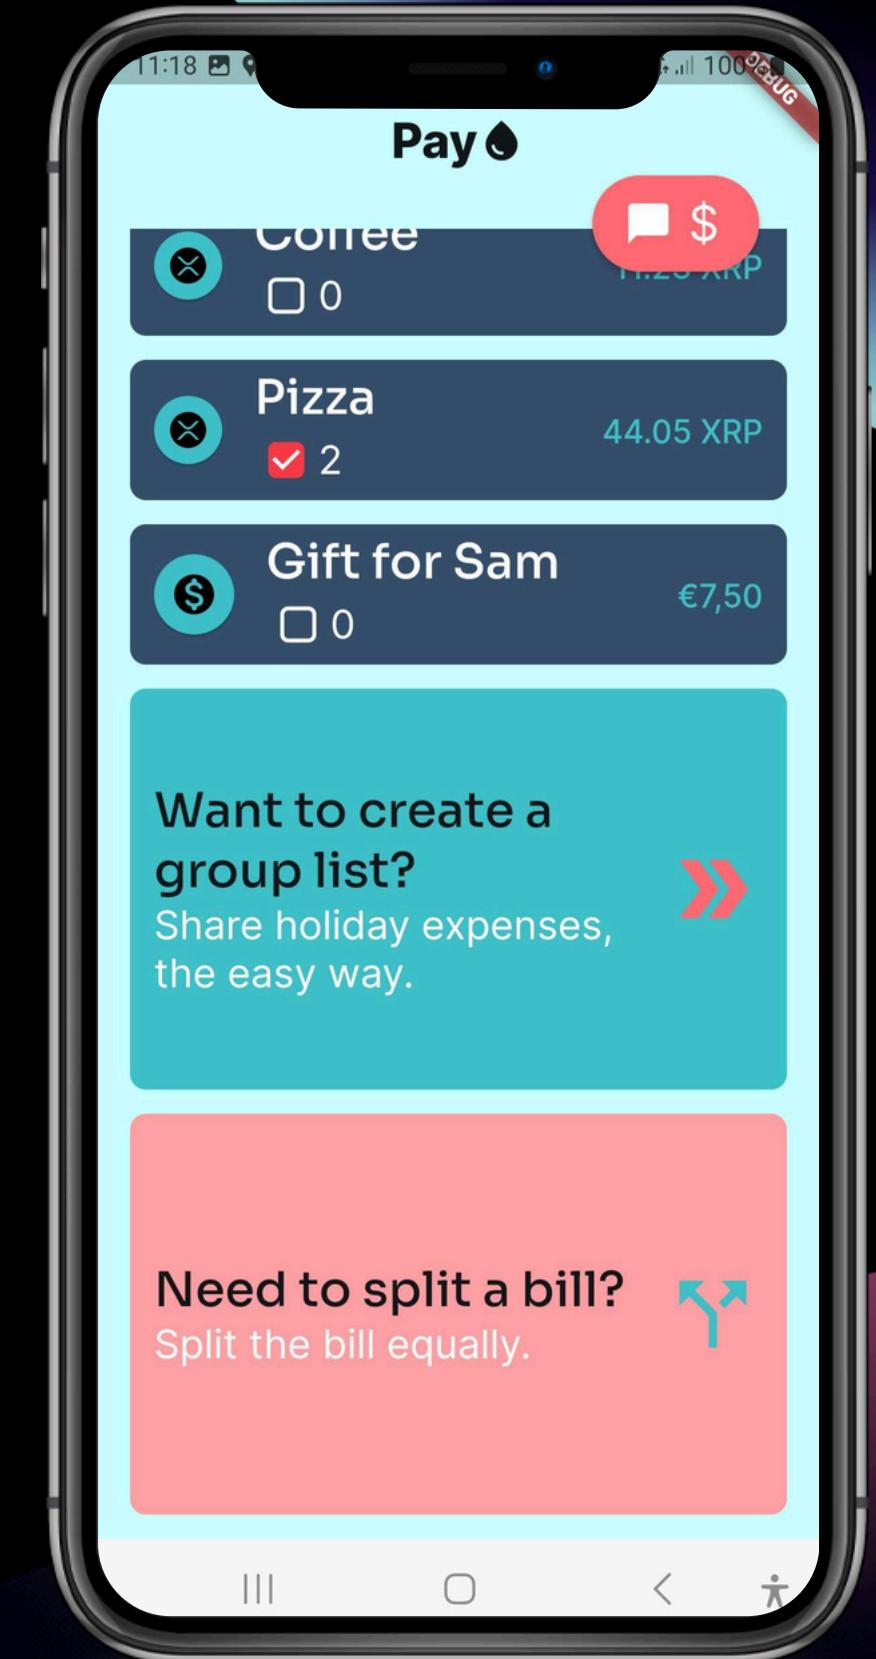

## **HIGH ENTRY BARRIER**

To pay, users often need to create an account and deposit funds

# Our solution

## PAYDROP

With **PayDrop** you can easily send payment requests via WhatsApp or QR code. We use blockchain technology to make international payments easy, fast, and cheap for users.

# 10K

In the Netherlands, more than 10k payment requests are sent daily via Tikkie for amounts lower than 2 euros.

# 300K

About 300K payments are made daily via Tikkie.

# PAYDROP

**Scale Tikkie on a global level, handling international bank transfers with low-cost, instantaneous payments with your phone.**

# DEMO

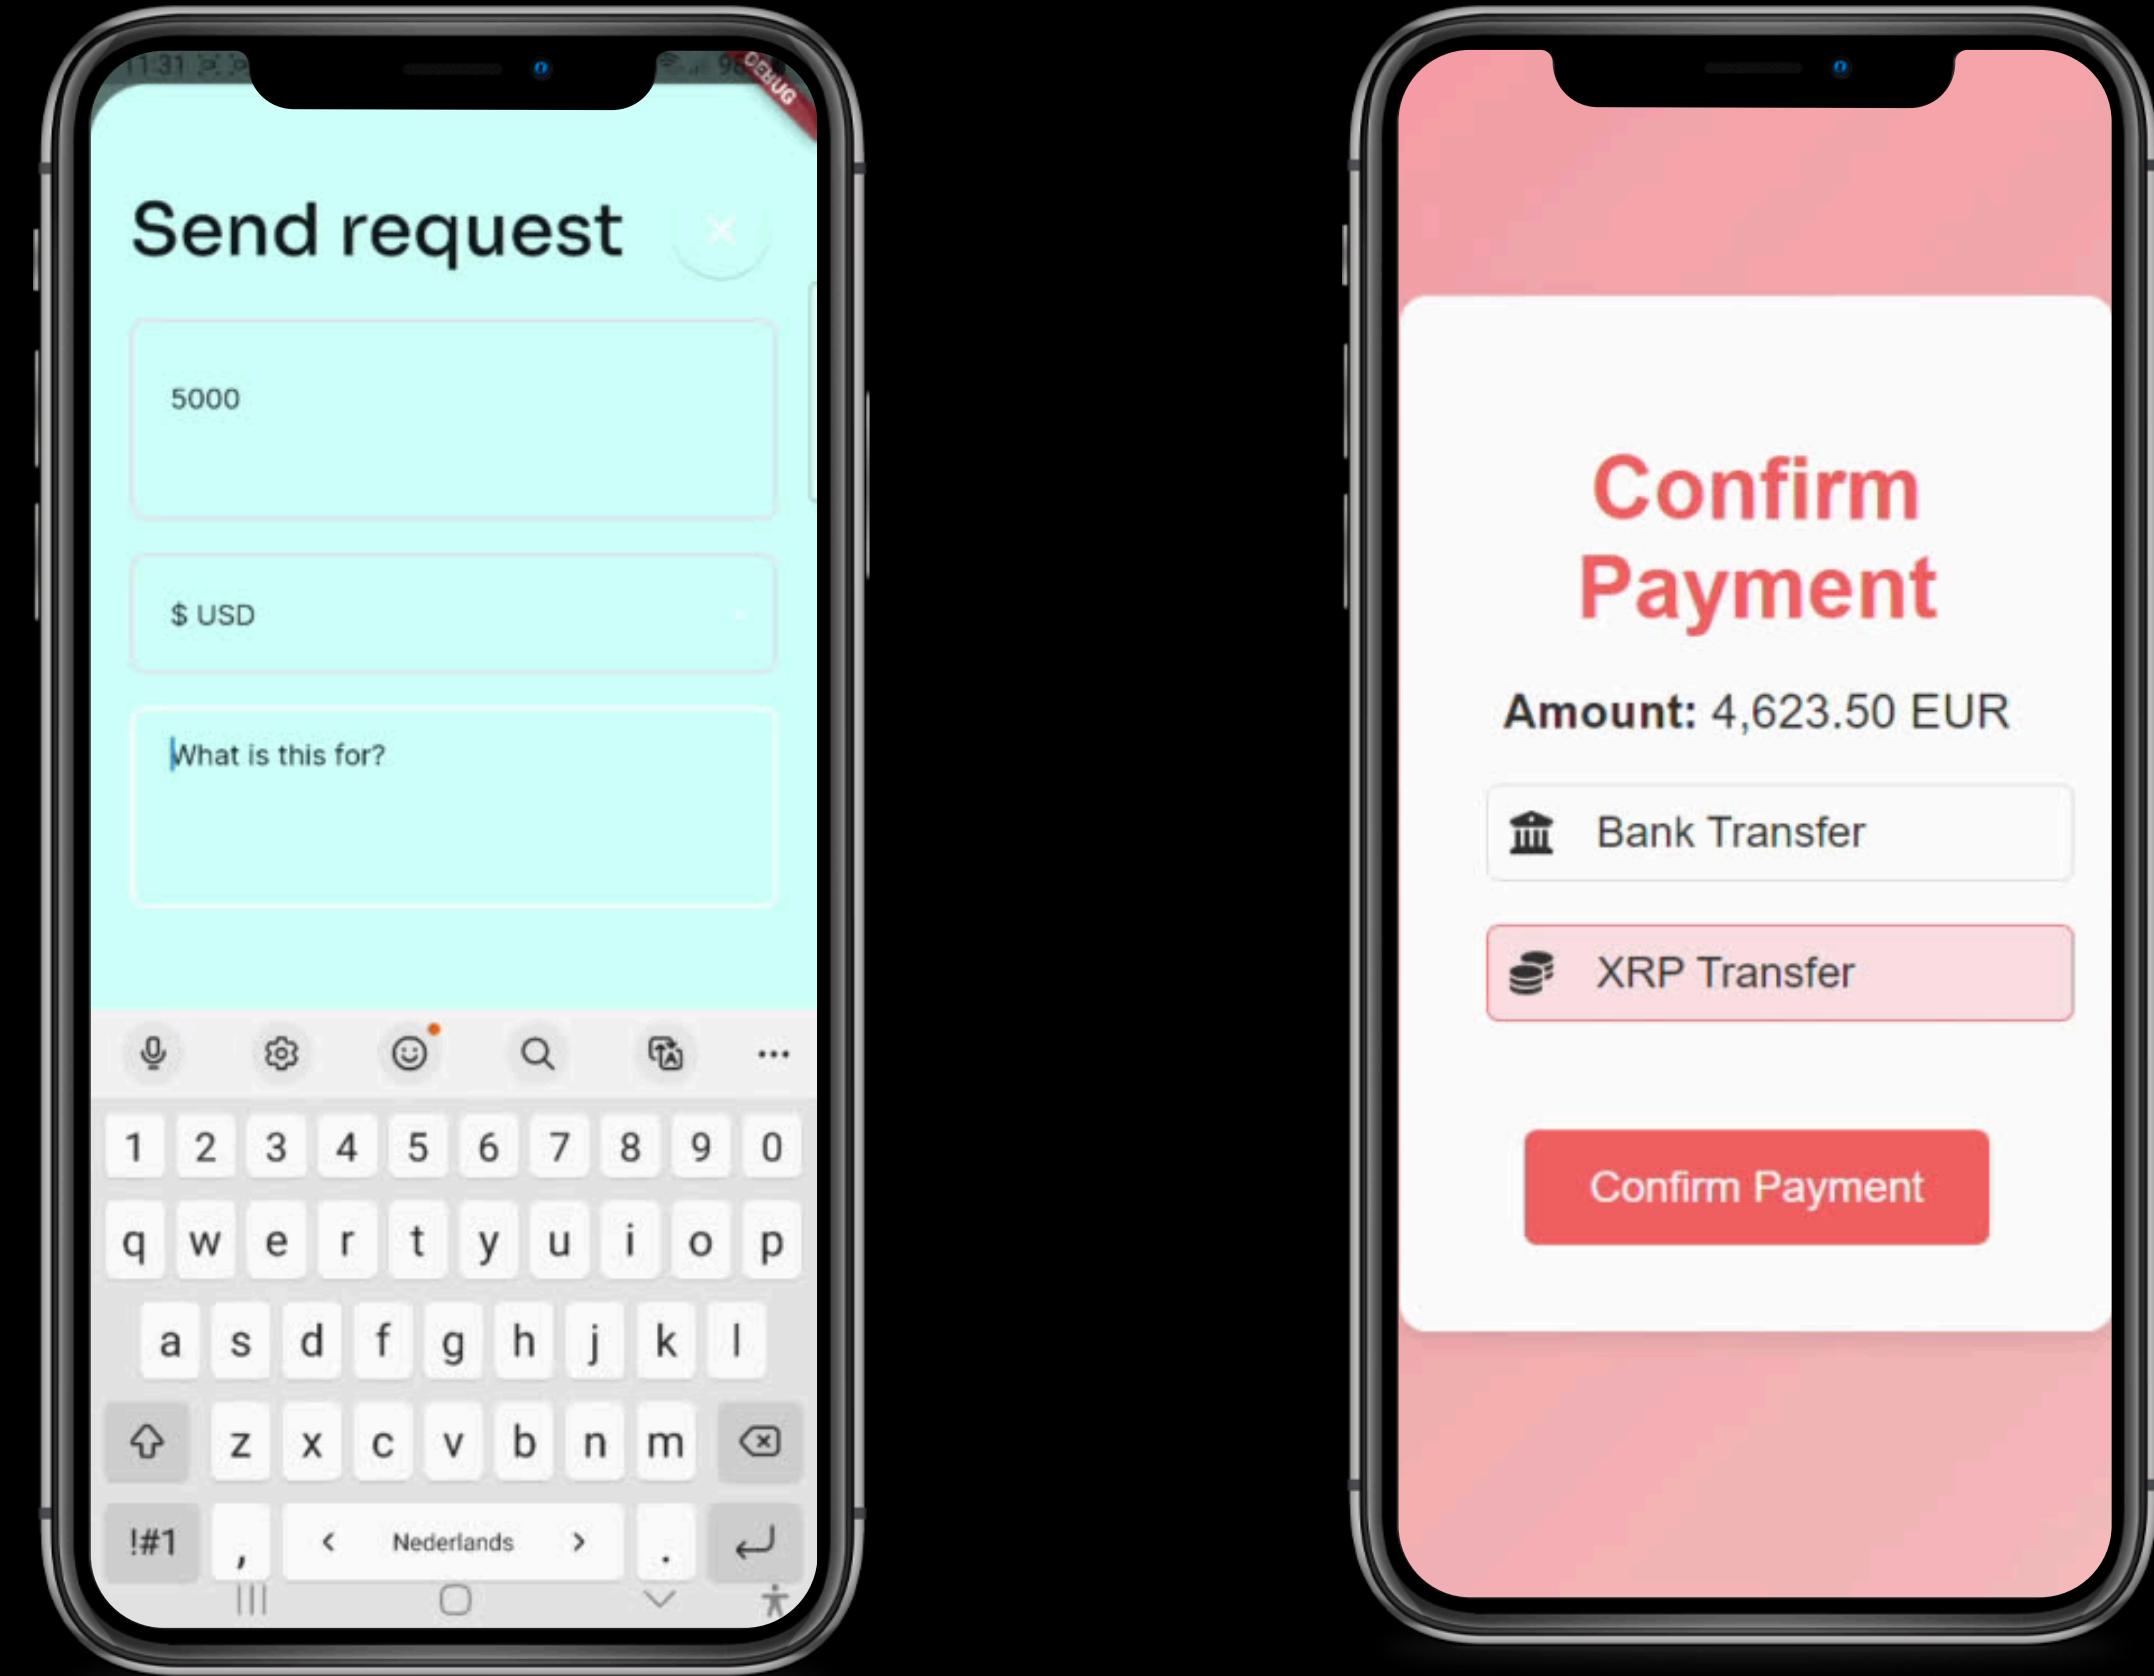

**ONE-SIZE-FITS-ALL**

**INSTANT**

**CHEAPER**

**TRANSPARENT**

**NO ENTRY BARRIER**

Sender

Receiver

# ROADMAP

## **Fiat on and off ramps**

The sender/receiver has the option to send/receive payments in any fiat currency or in crypto. This makes it easy for users to step into the crypto world.

## **Splitting bills**

Features like bill splitting and shared lists for holiday expenses make managing group expenses straightforward.

## **Loan money**

Loan money to your friend using a special feature, which generates fixed interests for you.

(Shoutout to Unity App team!!)

From the **PayDrop** team

THANK  
YOU!
